N-309VS performed reconnaissance over the Oklahoma Impact Area. No smoke was showing on the northern end of unit. Gustier and sustained wind contributed to active burning in the tundra on the southeast corner of unit where the fire is hung up on 100 Mile Creek. The fire is also burning in the southwest area to Delta Creek. All active fire behavior is within the fuel treatment prescription. Fuels treatments were observed to still be within the project area perimeter. Area will continue to be monitored from the air as weather allows.

Helicopter 1CV performed aerial ignitions in the Stuart Creek Impact Area with supervision from N-309VS. 14659 acres were treated within the fuels prescription.
